Profile

Specialized in React and Angular with proven expertise migrating legacy systems to modern architectures. Built scalable shared UI solutions and developed interfaces for AI-powered applications, including real-time streaming API integrations. Focused on performance optimization and user experience across complex, high scale products.

Experience

Frontend engineer | Harri

Jul 2025 – Present

- Migrated 100K+ lines of legacy AngularJS to React, enabling modern tooling and faster development cycles.
- Built scalable state management system and shared UI component library adopted by 6 teams across 20+ developers.
- Optimized streaming data handling for real-time AI agent responses, reducing latency and improving user experience.
- Integrated AI-assisted tools that accelerated feature delivery 3x.

Frontend Developer Intern | Foothill Technology Solutions

Mar 2023 – Jul 2023

- Built modularized React components with TypeScript and Redux Toolkit for efficient code reuse and testability.
- Developed features for POS system managing product inventory with senior oversight.
- Established frontend development practices improving codebase maintainability.

Education

An-Najah National University — Bachelor in Computer Science

Jun 2022 – Jun 2026

Graduated top of class with **3.83 GPA**

Projects

CV maker website (React, Tailwind CSS, TypeScript, ExpressJS, MongoDB, Anthropic API)

- Built PDF export pipeline with Puppeteer for one-click CV downloads
- Engineered live preview system with dynamic A4 pagination and responsive scaling across devices
- Implemented PDF upload and parsing to auto-populate CV fields from user documents
- Integrated AI-powered content suggestions to accelerate CV authoring

Messaging app (React, Firebase)

- Built real-time chat application with React and Firebase, supporting multi-user messaging
- Led team of 4 developers: assigned tasks, reviewed code, resolved merge conflicts, and debugged blockers

Skills

- | | | | |
|-------------|---|--------------|--------------|
| • React | • Angular, AngularJS | • JavaScript | • TypeScript |
| • CSS, SCSS | • HTML | • Git | • Bootstrap |
| • Tailwind | • Handling streaming API responses (AI, Big data) | | |
